

14 JAN 2020

I apologise for the lateness of this critique being due to my ill health, being a suspected heart attack.

It was an absolute pleasure to award C.C.s in a breed I have owned and loved for 43 years. Thanks to all the exhibitors for the sporting way my placing was received. I am happy to see so few exhibits with missing dentition and elated to have had very few without correct scissor bites. Many of the handlers were given notice on the day of certain areas which could be improved on, which in my opinion is kinder than criticising these exhibits in the dog press. Shoulder angulations have improved greatly since I last judged the breed, and particularly in upper forearm.
